Articles

1 Yang, X-N., Liu, J-R., Zhu, L-M. & Shi, G-J.: Early Permian bioevent in the fusulinacean fauna of South China

17 Nesbitt, E.A: A novel trophic relationship between cassid gastropods and mysticete whale carcasses

27 Johanson, Z., Burrow, C., Warren, A. & Garvey, J.: Homology of fin lepidotrichia in osteichthyan fishes

37 Wheeley, J.R. & Twitchett, R.J.: Palaeoecological significance of a new Griesbachian (Early Triassic) gastropod assemblage from Oman

47 Harada, K. & Tanabe, K.: Paedomorphosis in the Turonian (Late Cretaceous) collignoniceratine ammonite lineage from the north Pacific region

59 Cózar, P.: Recognition of allochthonous Mississippian foraminiferal assemblages using taphonomical alterations

67 Hammer, Ø. & Bucher, H.: Buckman's first law of covariation – a case of proportionality

73 Maletz, J., Steiner, M. & Fatka, O.: Middle Cambrian pterobranchs and the Question: What is a graptolite?

89 Tapanila, L.: Palaeoecology and diversity of endosymbionts in Palaeozoic marine invertebrates: Trace fossil evidence

101 Dornbos, S.Q., Bottjer, D.J., Chen, J.-Y., Oliveri, P., Gao, F. & Li, C.-W.: Precambrian animal life: Taphonomy of phosphatized metazoan embryos from southwest China

111 Hammer, Ø. & Bucher, H.: Models for the morphogenesis of the molluscan shell

123 Crônier, C., Auffray, J.-C. & Courville, P.: A quantitative comparison of the ontogeny of two closely-related Upper Devonian phacopid trilobites

137 Renema, W.: Depth estimation using diameter-thickness ratios in larger benthic foraminifera

143 Łuczyński, P.: Improving the parameterization of stromatoporoid shapes – a detailed approach to stromatoporoid morphometry

155 Butterfield, N.J.: Reconstructing a complex early Neoproterozoic eukaryote, Wynniatt Formation, arctic Canada

173 Klug, C., Schweigert, G., Dietl, G. & Fuchs, D.: Coleoid beaks from the Nusplingen Lithographic Limestone (Upper Kimmeridgian, SW Germany)

193 Hou, X.-G., Stanley Jr., G.D., Zhao, J. & Ma, X.-Y.: Cambrian anemones with preserved soft tissue from the Chengjiang biota, China

205 Burrow, C.J.: Histological structure of the cancellous bone layer in *Bothriolepis canadensis* (*Antiarchi, Placodermi*)

211 Vila, B., Oms, O. & Galobart, À.: Manus-only titanosaurid trackway from Fumanya (Maastrichtian, Pyrenees): further evidence for an underprint origin

219 Freeman, G. & Lundelius, J.W.: The transition from planktotrophy to lecithotrophy in larvae of Lower Palaeozoic Rhynchonelliform brachiopods

255 Farsan, N.M.: Description of the early ontogenic part of the Tentaculitids, with implications for classification

271 Tomašových, A. & Rothfus, T.A.: Differential taphonomy of modern brachiopods (San Juan Islands, Washington State): effect of intrinsic factors on damage and community-level abundance

297 Ezaki, Y. and Yasuhara, Y.: Regular mode of increase, and constrained but variable growth, in the Silurian rugose coral *Stauria favosa*

305 Hunter, A.W. and Donovan, S.K.: Field sampling bias, museum collections and completeness of the fossil record

315 Sénégas, F., Paradis, E. and Michaux, J.: Homogeneity of fossil assemblages extracted from mine dumps: an analysis of Plio-Pleistocene fauna from South African caves

323 Yamada, S., Tsukagoshi, A. and Ikeya, N.: Carapace formation of the podocopid ostracode *Semicytherura* species (Crustacea: Ostracoda)

333 Monaco, P., Giannetti, A., Caracuel, J.E. and Yébenes, A.: Lower Cretaceous (Albian) shell-armoured and associated echinoid trace fossils from the Sácaras Formation, Serra Gelada area, southeast Spain

345 Honeycutt, C. E. and Plotnick, R.E.: Mathematical analysis of *Paleodictyon*: a graph theory approach

351 Yancey, T.E., Stanley Jr., G.D., Piller, W.E. and Woods, M.A.: Biogeography of the Late Triassic wallowaconchid megalodontoid bivalves

367 Merle, D.: The spiral cords of the Muricidae (Gastropoda, Neogastropoda): importance of ontogenetic and topological correspondences for delineating structural homologies

Lethaia Seminars

86 Alvarez, F. & Brunton, C.H.C.: On the name-bearing type of *Athyris concentrica* (von Buch, 1834)

171 Carls, P. & Slavík, L.: Upgrading of magnetic susceptibility of conodont sample residues before magnetic separation

293 Moore, R.A. & Braddy, S.J.: A glyptocystitid cystoid affinity for the putative stem group chelicerate (Arthropoda: Aglaspidida or Xiphosura) *Lemoneites* from the Ordovician of Texas, USA

381 Dominici, S. and Zuschin, M.: Infidelities of fossil assemblages

Lethaia Forum
